RMC is a leader in risk management solutions

We provide a comprehensive suite of security, engineering, and risk management services to meet each Customer’s objectives.

RISK MANAGEMENT SOLUTIONS

We provide proven methods for establishing effective, analytically rigorous, repeatable, and adaptive risk management methodologies for leaders to make protection and mission-resiliency decisions. Through our experience and expertise, we deliver integrated risk management solutions proven to reduce risk and vulnerabilities.

*RMC developed the first mission-focused risk assessment within DoD for the USMC*

ENGINEERING SERVICES

Enhancing resiliency requires a “holistic” approach to energy security - this process considers every aspect of energy support to the mission. RMC evaluates resiliency across 16 determinant factors. Transposing these factors into practical applications clarifies approaches to improving system resiliency.

RMC has conducted Energy Security Assessments at Navy and Marine Corps Installations worldwide since 2014.

PHYSICAL SECURITY & LAW ENFORCEMENT

On-site assessments analyze threats to critical assets and personnel to identify vulnerabilities and areas of greatest risk. RMC’s Security Assessors are experienced security and law enforcement leaders who successfully meet the challenges of balancing risk within continual security operations and limited resources.

*RMC has executed global capability based assessments to identify service level security force risk*

RISK-BASED ENGINEERING PLANNING

RMC’s engineers assess utility systems and facilities containing mission assets. We identify deficiencies and potential weaknesses in these systems and recommend actions to correct and mitigate those weaknesses.

Our Company
RMC was founded for the purpose of improving the protection for our customer’s assets and resources. We conduct risk assessments at military installations worldwide. RMC contributes to contemporary and innovative risk assessment strategies and methods, establish benchmarks, and implement cybersecurity controls for military and commercial clients.

Business Units
SECURITY & RISK OPERATIONS
- Risk Management Solutions
- Engineering Services
- Risk-based Engineering Planning
- Physical Security & Law Enforcement

CYBERSECURITY OPERATIONS
- Strategy & Management
- Cyber Risk Assessments
- Securing Control Systems
- Accreditation & Compliance Services

TECHNOLOGY OPERATIONS
- Geospatial Information System Solutions
- Technology Analysis and Support

INTELLIGENCE & ANALYSIS
- Intelligence Support to Operations
- Threat & Hazard Analysis
- Knowledge Management
- Intelligence Training

PROGRAM SUPPORT

OUR EXPERTISE
Improving the protection of:
* PERSONNEL
* FACILITIES
* NETWORKS
* INFRASTRUCTURE

PRODUCTS AND SERVICES
- Mission Assurance Assessments
- Mission Analysis
- Cyber Compliance
- Risk-Based Assessments
- Securing Control Systems
- Infrastructure Assessments
- Energy Security & Resiliency Analysis
- Critical Infrastructure Protection

CONTRACT VEHICLES
GSA Schedules:
- 70 Information Technology
- 84 Law Enforcement
- MOBIS

IDIQ:
- Seaporte (Navy)
- OASIS
- EXWC (NAVFAC)

RMC supports complex missions by providing innovative solutions to asymmetric threats and challenges unique to military and federal assets.
